

INFORMATION SECURITY AWARENESS TRAINING

POLICY STATEMENT

Northern Arizona University owns or controls, or acts as custodian for, a broad array of information, including Sensitive Information protected by law. To safeguard this University Information, this policy establishes information security awareness training requirements for all University employees (including student employees) and all other persons authorized to access this material.

REASON FOR THIS POLICY

All authorized users should gain a broad understanding of information security threats, risks, and best practices in order to assist the University in protecting the integrity of University Information and the University's Information Technology ("IT") Resources.

ENTITIES AFFECTED BY THIS POLICY

- All units that interact with University Information or IT Resources
- External entities authorized to access University Information or IT Resources
- Information Security Services

WHO SHOULD KNOW THIS POLICY

- All persons authorized to access University Information or IT Resources
- Chief Information Officer
- Director, Information Security Services

DEFINITIONS

Information Technology ("IT") Resource: any computer, server, communication or mobile device, or electronic data, data storage, transmission or control device that is owned and/or operated by the University, used to conduct University business, or connected to the University's IT networking or communication systems regardless of ownership, location, or access method. These resources are referred to herein as "IT Resources."

Phishing: the fraudulent and malicious practice of sending electronic communications purporting to be from a reputable source in hopes of tricking or inducing the recipient to reveal sensitive or confidential personal information, such as passwords or credit card numbers.

Sensitive Information: all information that should remain private as designated by the University or as required by law, including but not limited to, educational and student conduct records, social security numbers, credit card or banking information, regulated research data, or health care provider records.

University Information: all written or verbal data or information that Northern Arizona University or its employees, students, and designated affiliates collect, possess, or have access to regardless of the medium on which it is stored or its format.

POLICY

A. Information Security Awareness Training Program

Acting through the Director of Information Security Services, the Chief Information Officer will establish and maintain an online information security awareness training program that will include testing to assess and ensure basic knowledge and comprehension. To demonstrate basic competency in information security best practices, all faculty, staff, and other authorized users of University Information or IT Resources must complete this training as part of the onboarding process, annually thereafter, or as may be required by the Chief Information Officer. Information Security Services will:

- develop or acquire appropriate information security training content and test materials
- update and revise training content, test materials, and delivery methods annually to reflect current threats and emerging information security best practices
- ensure a mechanism exists for feedback regarding the content and efficacy of the training program
- track and record testing completion rates and other useful program statistics
- report completion rates and follow-up with units not completing the mandatory training

B. Learning Objectives

The basic information security awareness training for all employees or agents will include:

- General information security awareness best practices
- Mobile device and wireless networking best practices
- Data confidentiality, integrity, and availability
- University IT Resource appropriate use and information security policies
- Individual employee information security roles and responsibilities
- Data classification and handling requirements
- How to identify suspicious or risky activities
- Cybersecurity threat reporting requirements
- Insider threat detection and reporting
- Information Technology security terms and definitions

Additionally, Information Security Services will provide role-based security training to employees and affiliates having unique, specific, or highly technical information security responsibilities (such as secure software development for web developers) as may be deemed appropriate for their roles or level of expertise. Students will have the option, but not the requirement, to complete the information security awareness training program.

C. Phishing

Employees whose accounts are found to be compromised by a successful Phishing attack will be required to retake and pass a specific Phishing security awareness training module.

D. Compliance

System access privileges may be revoked for employees or other authorized users for whom training is required who do not complete required information security awareness training within specified timelines, which shall not exceed sixty (60) days past onboarding, annually recurring, or other established training deadlines.

RESPONSIBILITIES

Chief Information Officer: ensures that appropriate and auditable information security awareness, training, and education controls are in place, and has ultimate responsibility for the content of the security awareness program.

Information Security Services: determines the information security training content and enforces the training requirement with all units, annually reviews and updates the training content as necessary or appropriate, maintains training statistics and reports completion rates.

Director of Information Security Services: reporting to the Chief Information Officer, provides leadership in security awareness, training, and education, and develops and implements the University's information security awareness training program roles.

PROCEDURES

There are no procedures associated with this policy.
