What is the plan for the Grand Canyon Watershed? What kind of distinctive life can be found in these proposed areas? Why should the area be protected as a National Monument? What are the setbacks of the area becoming a National Monument? Should we be concerned with the health of the local communities, the state, or the country as a whole? The Hot Topics Café series is made possible by the support from Arizona Humanities and NAU’s College of Arts and Letters, McKenzie Endowment for Democracy, SBS Compassion Project, and W.A. Franke College of Business.
