To Take Political Action For or Against Rooftop Solar

**350.org** is a global grassroots movement whose goal is to solve the climate crisis. A global network that is active in over 188 countries coordinates their online campaigns, grassroots organizing, and mass-public actions. Their work entails assisting with campaigns on fighting coal power plants in India, stopping the Keystone XL pipeline in the U.S., and leveraging people-power to dismantle the influence and infrastructure of the fossil fuel industry, ultimately developing people-centric solutions to the climate crisis.

**Tell Utilities Solar won’t be Killed (TUSK)** is a political organization consisting of conservative Republicans that are dedicated to keeping the solar industry viable in America, and keeping energy costs lower through competition. They work diligently to fight for the rights of solar customers against monopoly utilities that aim to eliminate the policy that lets homeowners receive fair credit for the surplus power they return to the grid.

**Vote Solar** is a non-profit grassroots organization working to fight climate change and foster economic opportunity by bringing solar energy into the mainstream. Through the Arizona Campaign, the organization has been actively engaged in local, state, and federal advocacy campaigns to eliminate regulatory barriers that have been placed on the solar industry. Go to their national website to join the organization or donate to their world. Their page on the Arizona Campaign provides information about the organization’s opposition to Arizona Public Service’s (APS) 2013 attempt to apply new fees on its customers that go solar.

**The Center for Industrial Progress** is a for-profit think-tank, which seeks to bring about a new industrial revolution. They believe this can be done though the liberation of industry from authoritarian government. A crucial part of their mission is to share their uniquely positive ideas and tactics with industry through training programs that inspire employees and empower communications teams.
