Research Involving Vulnerable Populations

January 27, 2017

10:30 a.m. - 2:30 p.m.

Flagstaff Medical Center's
McGee Auditorium

Presenters will address the unique concerns that arise when conducting research with vulnerable populations, such as children, Native Americans, and participants with sensitive past histories, such as drug abuse and incarceration. Of particular concern are the precautionary steps that must be taken when sharing data across agencies for collaborative population health and public health research.

Elements of Successful Community Collaboration

March 3, 2017

10:30 a.m. - 2:30 p.m.

NAU's Native American
Cultural Center

This workshop will explore elements of community engagement and stakeholder involvement. It will build on Workshop 2, Research Involving Vulnerable Populations, by acknowledging involvement of more than one Institutional Review Board, as well as opportunities and challenges related to working with vulnerable populations who may be represented by diverse agencies.

Getting the Word Out: Translating and Disseminating Research Results

April 7, 2017

10:30 a.m. - 2:30 p.m.

NAU's 1899 Ballroom

One of the challenges of closing the loop in research is translating and disseminating results back to community members in a way that is meaningful to them and provides direct benefits to our citizens. This workshop addresses this critical aspect of ethical research with case studies presented by successful researchers and their community partners who will share the processes they used to disseminate their research results.

Workshops are **free of charge** and include a light lunch.

Remote call in available!
