*2013
Annual
Yield*

Message from the Executive Director:

I am pleased to be able to introduce the 2013 edition of the *Annual Yield*. I'd like to begin with a big thank you to our Student Services Coordinator, Erin Saunders, and her very talented assistant, Stephanie Polk. The two of them have done the lion's share of the work in putting this latest edition of our yearbook together.

Hopefully you will enjoy this yearbook, which once again has done a great job of capturing many of the highlights of a busy, productive year in the School of Forestry. For the second time in three years, our student chapter of the Society of American Foresters won the Outstanding Chapter Award, which "Dr. H" and chapter president Katelynn Jenkins accepted at the SAF Convention in Spokane, with almost 30 other students looking on. Our other clubs also had strong, active years, which included travel to meetings, to the conclave in Missoula, and to do some prescribed burning in Nebraska, among other things. I can't help but feel proud of our students when I think back on all of their accomplishments of the past year.

We had some important transitions among our faculty and staff this year, including the hiring of two new assistant professors, Dr. Matthew Bowker and Dr. Andrew Sánchez Meador, both of whom are off to a great start. We also welcomed a new administrative associate, Karen Blalock, who quickly made herself into a key part of the School of Forestry community. On a sadder note, this is the last year that we'll have Erin Saunders serving as our Student Services Coordinator. She has done an outstanding job in that role for nearly three years now and I'll really miss her, although maybe not as much as some other people who have left us in the past, since she is moving just a little ways down the hall and into a graduate student office, where she will become a M.S. student working with Professor Carol Chambers.

Instructor

20 Year Anniversary...

An excerpt from the 1993 Annual Yield

OUR NEW HOME

The Southwest Forestry Sciences Complex was conceived in 1990. The idea was a response to concern by Senior Senator Dennis DeConcini that the issues of forest management in the Southwest were not sufficiently being addressed and should call for a directed scientific research effort. The facility was designed to foster a partnership between the N.A.U. School of Forestry and the U.S.F.S. Rocky Mountain Forest and Range Experiment Station. The purpose of the partnership is to conduct scientific research in ecology based multi-use forest management and also to bring the research to the classrooms (both graduate and undergraduate) and to forest managers and policy makers in the Southwest.

The S.W.F.S.C. is a multilevel building encompassing 120,000 square feet and containing faculty and research staff offices, as well as research, teaching, and computer laboratories, classrooms, and lecture halls. One side of the complex lodges the operations of the Arizona Rocky Mountain Forest and Range Experiment Station, and the other side houses the N.A.U. School of Forestry, with both wings joined by a common, two-story atrium and lobby.

The complex, built primarily with federally appropriated funds, was something to behold from afar. We found, however, that having a new building is not so satisfying as one imagines. Our first weeks as students in the new Complex were trying ones as we had to attend classes while the "kinks" were being worked out (i.e. classrooms with heaters gone haywire and stuffy rooms). The walls deafly received our curses. Little by little however, the building grew on us and now we consider it our "home away from home." I have seen my peers actively defend their territory within the once cursed walls. My friends, we've come home.
