

SCHOOL OF FORESTRY
NORTHERN ARIZONA UNIVERSITY
Individualized Focus Area

The Individualized focus area provides an opportunity for students to develop a self-designed focus. Students are encouraged to explore their area of interest with an appropriate faculty member, and work in collaboration to develop a plan of courses.

This focus area requires a total of 12 units, 6 of which must be upper division (300-400 level). The student must then prepare a 1 page written statement describing the purpose and scope of the proposed focus area and have the statement approved by the appropriate faculty advisor and School of Forestry Executive Director.

For help in coordinating your Individualized Focus Area, contact:
