Recruiting & Outreach at TTUHSC School of Medicine

Achieving our Mission's Goal

Louis Perez – Senior Director

Monica Galindo – Associate Director

February 18, 2023

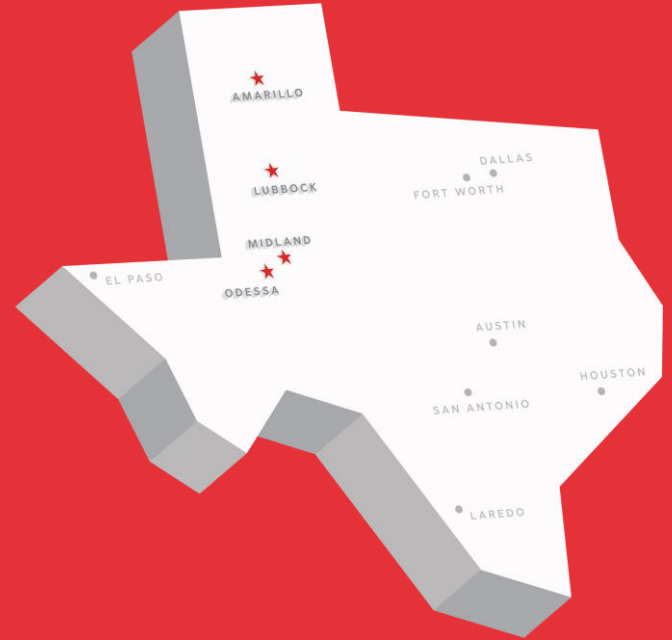

OBJECTIVES

1. Overview of TTUHSC School of Medicine Institutional Centric Missions
2. Recruiting individuals that meet our missions
3. Importance of Pipeline Programs
4. Maintaining Pipelines

MISSIONS

1. Produce more physicians for West Texas and beyond
2. Produce more physicians who will practice in rural and underserved areas
3. Produce more primary care physicians

WHERE CAN WE FIND THESE APPLICANTS?

- If we want to produce more physicians for rural areas of West Texas then we should recruit them from those same areas.
- “Medical students who grow up in small communities far from urban centers are much more likely to return to them to practice, research shows. So, many medical schools aim to identify potential candidates from rural communities and encourage them to take up medicine” (Jaret, 2020).
