

We CAN beat  
COVID-19

Register for a vaccine at **no cost** to you.  
Call **2-1-1** or visit **vaccines.gov** for a vaccination site near you.

With the Delta variant on the rise and many returning to in-person work and school, now more than ever is the best time to protect yourself and your family against coronavirus (COVID-19). Get the information you need to make an informed decision:

**? I know about COVID-19 but what is different about the Delta variant?**

The Delta variant is a more contagious strain of COVID-19, and it spreads quickly. If you are unvaccinated, you are at a higher risk of getting severely ill with the virus or getting the virus and spreading it to loved ones. COVID-19 vaccines help your body fight off the virus. HHS has developed a plan to offer COVID-19 booster shots, with individuals being eligible starting 8 months after receiving their second dose of an mRNA vaccine. The booster will be rolled out when approved by the FDA. For information, visit [CDC.gov/coronavirus](https://www.cdc.gov/coronavirus) or [COVID19.NIH.gov](https://www.covid19.nih.gov).

**? I am concerned about the short and long-term side effects of getting vaccinated?**

If you think you or your child might have a severe allergic reaction, please talk with your primary care or pediatrician. However, many people experience minor side effects — a normal sign that your body is building protection. Common side effects are redness and swelling at the injection site, tiredness, chills, or fever which goes away in a few days.

**? How can I protect my child from getting sick?**

You should teach your little one to wear a mask, practice social distancing, and the importance of washing their hands frequently to prevent the spread of germs and virus. These practices will help protect them and others from COVID-19. If your son or daughter is sick, please keep them at home.

**? Is the COVID-19 vaccine safe for children?**

The FDA and CDC have carefully reviewed the clinical trials for Cominarty (Pfizer) COVID vaccine, and it has been proven to be safe and effective for children 16 and older. Current safety tests are being conducted for minors under 12. The vaccines are being closely monitored to ensure the safety of the vaccines for all eligible age groups.

**IMMUNITY** starts  
with  
**COMMUNITY**  
THE ARIZONA CEAL CONSORTIUM

**Get vaccinated!**

**IMMUNITY COMMUNITY** starts with  
THE ARIZONA CEAL CONSORTIUM

## WHAT IS ARIZONA CEAL?

The Arizona Community Engagement Alliance (CEAL) Against COVID-19 Disparities is part of a 21-state alliance funded by the National Institute of Health (NIH). AZ CEAL works closely with the communities hit hardest by COVID-19. The AZ CEAL conducts Community-Engaged research and OUTREACH to increase COVID-19 AWARENESS and EDUCATION among communities disproportionately affected by COVID-19 and to reduce misinformation and mistrust. For more information on NIH CEAL, visit [COVID19COMMUNITY.NIH.GOV](https://COVID19COMMUNITY.NIH.GOV)

## AZ CEAL LEADERSHIP

The statewide efforts are coordinated by Arizona State University, Mayo Clinic, Northern Arizona University, and University of Arizona

## AZ CEAL PARTNERS

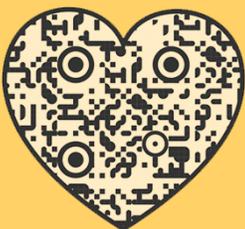

**AzCHOW**  
Arizona Community Health Workers Association

## #Immunity starts with Community

AZ CEAL aims to build long-lasting partnerships and improve diversity and inclusion in our research response to COVID-19.
