

Office of Sponsored Projects Policy on Classification of Grants and Contracts as Native American-related Grants

Effective: 07/01/2015

Authored by: Office of Sponsored Projects

Policy Statement

In order to ensure an accurate classification of Native American related grant and contract funding, this category will apply to those grants and contracts that specifically identify Native American groups as a focus of the funding. This categorization may include broad categories such as Native American students or Native Americans with health disabilities to more specific groups such as Native American environmental professionals, for example.

The categorization will not extend to non-human resources such a cattle or forests, for example, unless the funding specifically addresses impacts on or for Native American groups themselves, such as impacts from water contamination, for example.
