

American Indian and Alaska Native Research in the Health Sciences: Critical Considerations for the Review of Applications

Kathy Etz, Ph.D.

Director, Native American Program
National Institute on Drug Abuse

NIH Tribal Advisory Committee Meeting, August 22, 2019 Fairbanks, AK

Goals of the Document

- Improve the review of American Indian and Alaska Native (AI/AN) focused health research grant applications to the NIH by:
 - Assisting reviewers in understanding the implications of sovereign nation status for research including:
 - Unique context including approvals, data sharing, data ownership, approaches, community engagement, potential exemptions to NIH policies, etc.
 - Considering each Review Criteria, indicating relevant unique consideration
 - Providing examples of helpful, and less helpful, reviewer comments (not actual quotes)

*Thank you – to the Authors,
the Committee, NIH Staff and
the TAC*
